Length	49.2" / 1250mm	49.2" / 1250mm
Weight	121 lbs. / 55 kg	121 lbs. / 55 kg
Cable Length	330 ft. or 500 ft.	Up to 1000' / 300m
Camera Tractor	MicroGator [®] 2.0	MicroGator [®] Air
Chassis Power	.27 hp / 200 Watt	.27 hp / 200 Watt
Rotating Elbow	400°	400°
Top Speed	40 ft. per minute	40 ft. per minute
Cutting Motors	MicroGator [®] 2.0	MicroGator [®] Air
Power	4.7 hp / 3500 Watt	1.5 hp
Max. RPM	10,000 rpm	10,000 rpm

The MicroGator[®] Air is compatible with the components in our MainLite Systems including the KW206 and KW306 cable reels, our BP100 and BS10 control units, and even the same cable. With these components, all you need is a hose reel for the air hose and a compressor to have a complete cutting system!

The IBAK MicroGator[®] 2.0 is the impressive reinstatement cutter that is resetting the industry's expectations. It is equipped with a powerful, yet efficient electric motor that outperforms existing pneumatic and hydraulic grinding/cutting robots. It has a maximum revolution speed of 10,000 RPM while running at 3.5kW. The BG 1 Motor allows users to install a front-viewing camera that provides a better view to increase forward awareness. The IBAK CutterCam, found directly behind the cutting motor, gives you an incredible view of the work area and keeps the lens clean with our unique air-curtain technology. Having these two views paired with our fourth-axis articulation provides operators with ultimate control. With cable lengths extending up to 500 ft (150m), interchangeable cutting/grinding bits, and the ability to access lines from 8" (200mm) all the way up to 32" (800mm), the MicroGator[®] 2.0 is designed to withstand the toughest jobs.

MicroGator[®] 2.0

MicroGator[®] Air

IBAK has developed an affordable solution that is ideal for service providers seeking the benefits of having both a compact cutting system, as well as a complete inspection system. The IBAK MicroGator[®] Air is a pneumatic cutter designed with compatibility and convenience in mind. Equipped with a 1.5 horsepower pneumatic motor and manufactured to IBAK's exacting quality standards, the MicroGator[®] Air is a practical, yet reliable solution.

The MicroGator[®] Air shares many of the same features as the MicroGator[®] 2.0, such as fourth-axis articulation, which allows the user ultimate control during advanced cutting operations. The IBAK CutterCam is compatible with the MicroGator[®] Air and provides the best possible view of the cutting area. Even if it gets dirty, our unique air-curtain technology and remote wiper system will keep your camera lens clean with the push of a button.
